

## Our People

**Ian Arnold, MD, MSc, CSPQ, FCBOM, FRCPC, DOHS, CEA, CRSP**  
Occupational Health and Safety, Environmental Health and Safety

### Expertise:

- A senior occupational medical and environmental health and safety specialist well respected by peers and associates
- An experienced manager who can interface effectively with all facets of corporate organizations, national and international governments, non-governmental organizations, and trade groups
- An empowering leader with a record of driving continual improvement of OHS and EHS management in Canadian and international settings.

### Profile:

Starting in the mid 1990's, Ian was responsible for all aspects of the management of occupational health and safety for Alcan's international group of companies and later added the environmental aspects to his corporate role at Alcan Inc. (now Rio Tinto/ Alcan Inc.). His Corporate level, responsibilities encompassed leadership, strategy (including development of standards and people), and due diligence (such as of metrics, analysis of results, assessment of audit performance, analysis of compliance). Prior to his work at Alcan, Ian held similar corporate roles in Occupational Health at Noranda Inc.

During his earlier tenure with Dow Chemical Canada, he was responsible for all facets of occupational health (O.H.) including roles in occupational health service provision (corporate and some regional locations), product stewardship, development and management of policy for occupational health services, participation on multi-functional, multinational Dow issues teams, and supervision of other occupational health professionals.

While working in the industrial sector, Ian also held academic appointments with the Faculties of Medicine at five Canadian Universities. He has 55 scientific presentations and/or publications to his credit. He is a Fellow and past president of the Canadian Board of Occupational Medicine and a Fellow specializing in Occupational Medicine with the Royal College of Physicians and Surgeons of Canada (FRCPC). He is now carrying out contract work in EHS for a variety of clients, including the International Aluminium Institute, and is teaching in the post-graduate Occupational Health Masters Program at McGill University.

### Education:

- MD, Queen's University, 1968
- DOHS, Diploma in Occupational Health and Safety, McMaster University, 1981
- CRSP, Registered Safety Professional, 1983
- CEA, Certified Environmental Auditor, 1996
